National Association for Gifted Children Picks Professor Noggin's Card Games

Victoria, BC, August 7, 2003 – High-potential youngsters looking for helpful products to learn need not look further than the kid-friendly *Professor Noggin's Card Game Series*, according to the National Association for Gifted Children (NAGC). The not-for-profit organization awarded the popular game series a valued *Parenting for High Potential Magazine* Award today.

Professor Noggin's Card Game Series, which has a dozen titles ranging from Life in the Ocean to Outer Space, was selected for inclusion in the NAGC's Holiday Educational Toy List 2003, set for release in the September issue of *Parenting for High Potential Magazine*.

"This is a true honor to be recognized by such an elite group of parents, teachers, educators and other community leaders. As with the National Association for Gifted Children, we strive to improve the quality of education for all students with our Professor Noggin Card Game Series," said David Manga, creator of Professor Noggin games, and president of game company Outset Media.

NAGC's Holiday Toy List, which generally lists 25 products a year, is singled out as a highly respected inventory of appropriate educational resources for children of high potential. In past years, the list has harvested over 5,000 individual requests, and has been reprinted in over 100 parent publications. NAGC is based in Washington, DC.

Professor Noggin's Card Game Series features titles on Ancient Civilization, Famous Inventions, Wonders of Science, First Peoples of North America, Outer Space, Countries of the World, Dinosaurs, Life on the Farm, Birds of North America, Insects and Spiders, Wildlife of North America, and Life in the Ocean. The Series has recently won a Parents' Choice Award and Dr. Toy's Best Vacation Product Award.

Each Professor Noggin game is for ages 7 and up and combines short answer, true/false, and multiple choice questions using 30 professionally illustrated cards. Players make unusual discoveries while questioning each other on fascinating facts. A special three-numbered die is included, which creates interaction and promotes communication between players.
